Dear alessandro Fans & Friends

A shared vision has made the alessandro family unique for 33 years! First-class quality, continuous innovation, new technologies and international style come together under the peacock's feathers.

Through the development of high-quality textures, patented formulas – “created in Germany” and tailor-made service, alessandro is the number one partner for the nail professional. Fashion and beauty fans all over the world love the creative and passionate application of the latest trends for their nails. Also current issues, such as sustainability are placing new demands on the beauty industry.

VEGAN has been the word on everyone's lips for some time. And whereas people were still perplexed by the meaning of vegan a few years ago, today almost everyone knows what a vegan lifestyle means.

Vegan is in fact not just a trend, but an attitude towards life. Many of our textures are already VEGAN. In order to protect our environment and oceans, today we offer many of our textures without microplastics, silicone and mineral oils. Our promise for the future is: Even more sustainable ingredients, packaging and product formulas to protect the environment and oceans in this world.

In time with alessandro's 33rd birthday and the 10-year anniversary of Striplac, we are looking forward to presenting our latest product portfolio to you over the following pages.

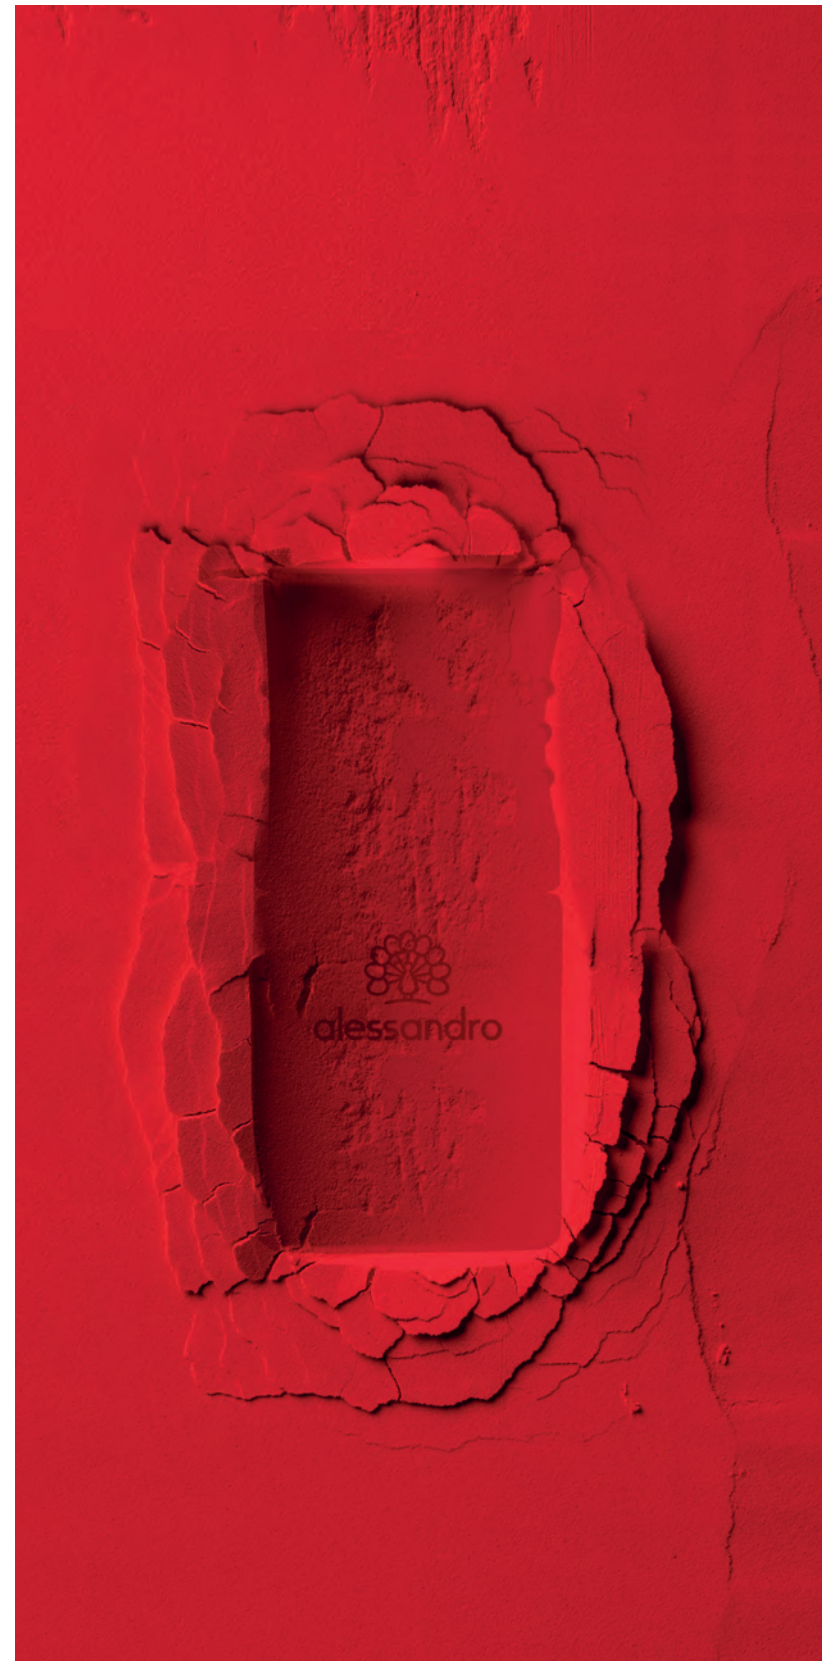

Alessandro's success story goes on... be a part of it or become a success too – we look forward to seeing you!

A well-known politician said many years ago,
“The best way to predict the future”, is to shape it.”
We look forward to walking this path with you!

Your alessandro Team

BONDING AGENT

alessandro Bonding Agents provide the basis for the uncompromising and strong adhesion of all alessandro sculpting gels. The alessandro bonding agents are all-round products that can be applied under any UV/LED sculpting gel.

BOND ULTRA SOFT
Acid-free, light-curing bonding agent that also promises optimum adhesion for soft nails. Very flexible after curing. Minimal sweating layer.

01-065 7.5

BOND STRONG BONDING AGENT
Bond Strong provides the base for the uncompromising and strong adhesion of all alessandro sculpting gels. The slightly acidic bonding agent offers ultimate adhesion even for problem nails and solves severe adhesion problems.

01-957 7.5 g

BOND ULTRA STRONG BONDING AGENT
Light-curing bonding agent with an acid content of 10%. It is particularly recommended when changing from highly acidic products and solvents and from powder-liquid systems. For moist, oily natural nails with a tendency for lifting.

01-959 7.5 g

PEDI BASE COAT
Pedi Base Coat offers the perfect, acid-free base for any light-curing colour pedicures. It provides an optimum, strongly adhering primer, balances out uneven nail surfaces and protects the sensitive nail plate from any discolourations. Pedi Base Coat cures under UV/LED light and is exclusively suitable for applying to toenails.

01-038 10 ml

PREP & PRIME
Prep & Prime is more than a typical dehydrator. The acid-free ingredients degrease, dehydrate and prime the natural nail and perfectly prepare the nail surface for subsequent products. The dehydrator air dries and no curing is required. The bonding booster strengthens the adhesion of light-curing base coats and bonding agents many times over and can be applied under PROLAQ and under any bonding agent (not suitable under Striplac and nail polish).

01-485 10 ml

SCULPTING GEL

alessandro UV/LED gels offer the best formulation for all customer requirements and all nail types. Depending on your requirements for the perfect sculpting material you can choose between the consistencies of honey-like (self-smoothing) and jelly-like (ready for sculpting).

The gel range includes camouflage, French and sealing gels.

ESSENTIAL OILS

Essential oils have a beneficial effect on the soul. They can be applied in many simple ways. The scent molecules penetrate via the nose to the olfactory mucosa that is part of the central nervous system. The sense of smell itself is located in the oldest part of the brain, the limbic system. Here, the olfactory stimuli can initiate the distribution of messenger substances which have a pain-relieving effect or generate a feeling of comfort. Endorphins are also distributed. These have a strong pain-relieving effect and lift the mood.

TREATMENT RITUALS

Exclusive treatments in only 40 – 45 minutes!

REFRESH YOUR HANDS!

- Coldness can affect the skin's elasticity
- Irritation increases the skin's tightness
- Coldness alleviates pain

MIRACLES HAPPEN ALL THE TIME!

- Just a few minutes to a noticeably smooth complexion
- Soothes, triggers circulation and revitalises the skin

HANDPICKED WINTERTIME!

- Warmth has a relaxing effect
- Improves the skin's elasticity

alessandro **ACADEMY**

Education and training – From beginner to professional

The alessandro ACADEMY is one of the most accomplished training centres in nail design worldwide and is known for its high quality standards – this is the case in particular for the well-established education and training of nail stylists.

In cooperation with experienced experts, alessandro has developed a philosophy of holistic, gradual and highly practical training for nail stylists.

The alessandro ACADEMY will support you in every training wish and forms an ideal basis for professional further development or self-employment.

All seminars are carried out in line with the latest knowledge and up-to-date techniques.

The alessandro training team comprises highly qualified experts who are committed to their 'craft' with the utmost passion and live and love it every day. Thanks to many years of training experience, they also have the talent of being able to teach technical contents and techniques in a way that is easy to understand. So learn from the masters and benefit from their experiences, which you can fall back on at any time after the training. This will give you support and safety in your everyday working life.

No master has ever fallen from heaven, but we will make one out of you!
